|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| 1) Adam Pawłowski, Wiesław Zima, Sławomir Grądział, Artur Cebula, Monika Piwowarczyk, Ewa Kozak-Jagięła<br>Experimental verification of the effectiveness of CO <sub>2</sub> capture from flue gas after pulverised coal combustion.....                                             | 5–14   |
| 2) Katarzyna Katana, Andrzej Grzebielec, Adam Szelański, Maksymilian Kruk, Krzysztof Bruzi<br>Experimental study of a reversible ventilation – heat pump system with a ceramic regenerator.....                                                                                      | 15–24  |
| 3) Nadiya Philip, Prakash Chandra Ghosh<br>Phase change material for thermal management of high-temperature proton exchange membrane fuel cells in electric vehicle.....                                                                                                             | 25–30  |
| 4) Robert Szczepaniak, Andrzej J. Panas, Łukasz Omen, Maciej Starczewski, Maciej Kowalski<br>Comparative experimental studies of the specific heat of Fe and Ni using scanning calorimetry methods.....                                                                              | 31–39  |
| 5) Youcef Lakahal, Houssein Laidoudi<br>Rheological and porous effects on mixed convection: Power-law fluid flow in a finned annular configuration.....                                                                                                                              | 41–55  |
| 6) Seweryn Szultka, Stanisław Czapp, Adam Tomaszewski, Marian Czapp<br>A method for determining the current-carrying capacity and durability of power cables based on variable ambient temperature and solar radiation.....                                                          | 57–67  |
| 7) Aed Ibrahim Owaed, Sabah M. Hadi, Husam Sabeeh Al-Arab<br>A novel passive solar energy space heating design of an emergency tent.....                                                                                                                                             | 69–77  |
| 8) Emad Jaleel Mahdi, Hussein Fawzi Hussein, Ali Isam Ata<br>Dual-use PV canopies for public gardens: Performance, techno-economic feasibility, and CO <sub>2</sub> mitigation of an 84.5 kWp grid-tied system in Baghdad, Iraq.....                                                 | 79–88  |
| 9) Tuba Fatima, Saurabh Patel<br>Numerical investigation of heat transfer in a partially porous-filled channel with core and wall configurations.....                                                                                                                                | 89–98  |
| 10) Chegu Ramprasada, Chundru Maheswari, Bhavanam Naga Lakshmi, Tadavarthi Madhu Mohan, Ravuri Mohana Ramana<br>Mixed convective chemically reacted hybrid nanofluid flowing over a non-isothermal/non-isosolutal cone/wedge with heat generation/absorption: A numerical study..... | 99–110 |
