

Contents

D. TALER, S. GRĄDZIEL AND J. TALER: Measurement of heat flux density and heat transfer coefficient	3
W. ZIMA, S. GRĄDZIEL AND A. CEBULA: Modelling of heat and flow phenomena occuring in waterwall tubes of boilers for supercritical steam parameters	19
S. ŁOPATA AND P. OCŁOŃ: Investigation of the flow conditions in a high-performance heat exchanger	37
P. DUDA AND D. RZAŚA: A new method for determining allowable medium temperature during transient operation of thick-walled elements in a supercritical power plant	55
Ł. MIKA: Loss coefficients of ice slurry in sudden pipe contractions	73
P. WAIS: Fluid flow consideration in fin-tube heat exchanger optimization	87
T. CHMIELNIAK AND H. ŁUKOWICZ: Condensing power plant cycle – assessing possibilities of improving its efficiency	105
A. ZIĘBIK, K. HOINKA AND M. LISZKA: Life cycle assessment analysis of supercritical coal power units	115
W. KOSMAN: The influence of external cooling system on the performance of supercritical steam turbine cycles	131
J. KOTOWICZ, A. SKOREK-OSIKOWSKA AND K. JANUSZ-SZYMAŃSKA: Membrane separation of carbon dioxide in the integrated gasification combined cycle systems	145
G. SZAPAJKO AND H. RUSINOWSKI: Mathematical modelling of steam-water cycle with auxiliary empirical functions application	165
S. WIŚNIEWSKI AND A. BORSUKIEWICZ-GOZDUR: The influence of vapor superheating on the level of heat regeneration in a subcritical ORC coupled with gas power plant	185
