T. WILCZEWSKI: Determination of the thermal conductivity of material dividing the metallic core elements of the bi-calorimeter using modified theory	3
S. KOWALCZYK, M. KARCZ and J. BADUR: Analysis of thermodynamic and material properties assumptions for three-dimensional SOFC modelling	21
J. ZMYWACZYK: Simultaneous estimation of the emissivity and the temperature-dependent thermal conductivity and specific heat in a semitransparent plane layer by an inverse method	39
G. NOWAK, I. NOWAK and T. CHMIELNIAK: Optimization procedure of blade cooling system	63
S. SIENIUTYCZ: Thermodynamic and variational aspects in modelling and simulation of biological evolution	83
D. MIKIELEWICZ and J. WAJS: Improved model of void fraction distribution in two-phase flow in the boundary layer	95
