

Contents

K. BADYDA, W. BUJALSKI, G. NIEWIŃSKI AND M. WARCHOŁ: Selected issues related to heat storage tank modelling and optimisation aimed at forecasting its operation	3
J. KUPECKI AND K. BADYDA: SOFC-based micro-CHP system as an example of efficient power generation unit	33
A. GRZEBIELEC AND A. RUSOWICZ: Experimental and theoretical studies on heat and mass transfer in anti-condensation coatings	45
D. MIKIELEWICZ AND J. MIKIELEWICZ: Utilisation of bleed steam heat to increase the upper heat source temperature in low-temperature ORC	57
A. ZIĘBIK AND P. GŁADYSZ: Optimal coefficient of the share of cogeneration in the district heating system cooperating with thermal storage	71
T. CHMIELNIAK, S. LEPSZY AND D. CZAJA: The use of air-bottoming cycle as a heat source for the carbon dioxide capture installation of a coal-fired power unit	89
J. TALER, D. TALER, T. SOBOTA AND P. DZIERWA: New technique of the local heat flux measurement in combustion chambers of steam boilers	103
D. TALER AND P. MADEJSKI: Thermomechanical CSM analysis of a superheater tube in transient state	117
H. ŁUKOWICZ, S. DYKAS, K. STĘPCZYŃSKA AND S. RULIK: The effect of the internal reheat application on the efficiency of the 900 MW ultra-supercritical coal-fired power unit	127
A. KACPRZAK, R. KOBYLECKI AND Z. BIS: Clean energy from a carbon fuel cell	145
J. TALER AND A. CEBULA: Verification of heat flux and temperature calculation on the control rod outer surface	157

S. RULIK, L. REMIORZ AND S. DYKAS: Application of CFD technique for modelling of the thermoacoustic engine	175
S. GRĄDZIEL: Determination of temperature and thermal stresses distribution in power boiler elements with use inverse heat conduction method	191
W. KOSMAN: Feasibility study of forced cooling of a supercritical steam turbine after a shut down of a power generating unit	201
M. SZEGA: Application of the entropy information for the optimization of an additional measurements location in thermal systems	215
H. ŁUKOWICZ, S. DYKAS, S. RULIK AND K. STĘPCZYŃSKA: Thermodynamic and economic analysis of a 900 MW ultra-supercritical power unit	231
J. PORZUCZEK: Transfer function matrix model of the bubbling fluidized bed boiler	245
A. KLIMANEK, T. MUSIOŁ AND A. STECHMAN: Optimization of guide vane positions in bended inflow of mechanical draft wet-cooling tower	263
