

Contents

P. KRAWCZYK AND K. BADYDA: Two-dimensional CFD modeling of the heat and mass transfer process during sewage sludge drying in a solar dryer	3
D. TALER AND A. SURY: Inverse heat transfer problem in digital temperature control in plate fin and tube heat exchangers	17
D. WĘCEL AND W. OGULEWICZ: Study on the possibility of use of photovoltaic cells for the supply of electrolyzers	33
M. JAREMKIEWICZ: Reduction of dynamic error in measurements of transient fluid temperature	55
T. BURY: Thermodynamic consequences of hydrogen combustion within a containment of pressurized water reactor	67
J. KOTOWICZ, H. ŁUKOWICZ, Ł. BARTELA AND S. MICHAŁSKI: Validation of a program for supercritical power plant calculations	81
D. RZAŚA AND P. DUDA: Numerical method for determining the allowable medium temperature during transient operation of a thick-walled boiler element in power plant	91
H. RUSINOWSKI AND G. SZAPAJKO: Energy evaluation of steam-water cycle operation with mathematical modelling application	101
