|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A. ZIĘBIK: Thermodynamical motivation of the Polish energy policy .....                                                                                                     | 3   |
| J. SARKAR AND S. BHATTACHARYYA: Operating characteristics of transcritical CO <sub>2</sub> heat pump for simultaneous water cooling and heating .....                       | 23  |
| J. MILEWSKI, W. BUJALSKI AND J. LEWANDOWSKI: Thermodynamic analysis of biofuels as fuels for high temperature fuel cells .....                                              | 41  |
| M. PIASECKA: An investigation into the influence of different parameters on the onset of boiling in minichannels .....                                                      | 67  |
| O.A. AWOGA, A.N. IKOT, E.E. ITUEN AND L.E. AKPABIO: Evaluation of the thermodynamics of a four level system using canonical density matrix method .....                     | 91  |
| M.B.K. MOORTHY AND K. SENTHILVADIVU: Effect of variable viscosity on free flow of non-Newtonian power-law fluids along a vertical surface with thermal stratification ..... | 109 |
