

Contents

Ł. DUNAJSKI, W. KRUK AND W. NOWAK: Preventing circulating fluidised bed agglomeration and deposition during biomass combustion	3
E. ORSZULIK, J. JACHYRA AND A. WASYLEWICZ: The concept of energy production on the basis of modern alternative fuels	19
L. REMIORZ, S. RULIK AND S. DYKAS: Numerical modeling of CO ₂ separation process	41
M. PIASECKA AND B. MACIEJEWSKA: Application of the finite element method to the determining of boiling heat transfer coefficient for minichannel flow	55
R. WYCZÓŁKOWSKI AND D. MUSIAŁ: Analysis of the occurrence of natural convection in a bed of bars in vertical temperature gradient conditions	71
V. DUBOVSKY, G. ZISKIND AND R. LETAN: Temperature moderation in a multi-storey building by melting of a phase-change material	85
