

Contents

D. RZAŚA AND P. DUDA: Determination of allowable fluid temperature during start-up operation of outlet header under the assumption of constant and temperature-dependent material properties	3
P. OCŁOŃ, S. ŁOPATA AND M. NOWAK: Comparative study of conjugate gradient algorithms performance on the example of steady-state axisymmetric heat transfer problem	15
K. RUP AND A. DRÓZDŹ: The effect of reduced heat transfer in a micropolar fluid in natural convection	45
J. MIKIELEWICZ AND D. MIKIELEWICZ: On the efficient use of a low temperature heat source by the organic Rankine cycle	61
R. LASKOWSKI AND J. LEWANDOWSKI: A simplified mathematical model of a U-tube steam generator under variable load conditions	75
A. RUSIN, M. LIPKA AND H. ŁUKOWICZ: Selection of the rotor heat-up rate for supercritical parameter turbines	89
A. ZIĘBIK AND P. GŁADYSZ: Analysis of the cumulative exergy consumption of an integrated oxy-fuel combustion power plant	105
J. KOTOWICZ AND A. DRYJAŃSKA: Supercritical power plant 600 MW with cryogenic oxygen plant and CCS installation	123
W. RYBIŃSKI AND J. MIKIELEWICZ: Optimization of idealized ORC in domestic combined heat and power generation	137
Z. DROŻYŃSKI: Entropy increase as a measure of energy degradation in heat transfer	147

J. RAK: The thermal-flow behavior of the working chamber in an oil-free scroll compressor	161
P. SMAKULSKI: Method of high heat flux removal by usage of liquid spray cooling	173
R. KOBYLECKI, M. ŚCISŁOWSKA AND Z. BIS: Carbonization of biomass – an efficient tool to decrease the emission of CO ₂	185
M. TRELA, R. KWIDZIŃSKI AND D. BUTRYMOWICZ: A study of transcritical CO ₂ cycles with heat regeneration	197
