

Contents

A. FIC, J. SKŁADZIEŃ AND M. GABRIEL: Thermal analysis of heat and power plant with high temperature reactor and intermediate steam cycle	3
T. KRYSIŃSKI, Z. BULIŃSKI, AND A.J. NOWAK: Numerical modeling and preliminary validation of drag-based vertical axis wind turbine	19
A. HNYDIUK-STEFAN J. SKŁADZIEŃ: The analysis of parameters of the cryogenic oxygen unit cooperating with power plant to realize oxy-fuel combustion .	39
W. STANEK, J. SZARGUT, Z. KOLENDA AND L. CZARNOWSKA: Influence of nuclear power unit on decreasing emissions of greenhouse gases	55
T. KRUCZEK: Conditions for the use of infrared camera diagnostics in energy auditing of the objects exposed to open air space at isothermal sky	67
B. MENDECKA AND J. KOZIOŁ: Application of the method of data reconciliation for minimizing uncertainty of the weight function in the multicriteria optimization model	83
K. BOCHON AND T. CHMIELNIAK: Energy and economic analysis of the carbon dioxide capture installation with the use of monoethanolamine and ammonia	93
A.A. STACHEL AND S. WIŚNIEWSKI: Influence of the type of working fluid in the lower cycle and superheated steam parameters in the upper cycle on effectiveness of operation of binary power plant	111
M. TROJAN: Computer modeling of a convective steam superheater	125
R. DYGA AND L. TRONIEWSKI: Convective heat transfer for fluids passing through aluminum foams	139
M. CHOROWSKI AND W. GIZICKI: Technical and economic aspects of oxygen separation for oxy-fuel purposes	157
ERRATUM	171
