

Contents

W. ROETZEL AND C NA RANONG: Evaluation method of single blow experiment for the determination of heat transfer coefficient and dispersive Peclet number	3
T. BOHDAL, M. SIKORA, K. WIDOMSKA AND A.M. RADCHENKO: Investigation of flow structures during HFE-7100 refrigerant condensation	25
J.T. CIEŚLIŃSKI, K. RONEWICZ AND S. SMOLEŃ: Measurement of temperature-dependent viscosity and thermal conductivity of alumina and titania thermal oil nanofluids	35
J. WAJS, D. MIKIELEWICZ, E. FORMALIK-WAJS AND M. BAJOR: Recuperator with microjet technology as a proposal for heat recovery from low-temperature sources	49
L. VASILIEV, L. VASILIEV, A. ZHURAVLYOV, A. SHAPOVALOV AND A. RODIN: Vapordynamic thermosyphon – heat transfer two-phase device for wide applications	65
L. DZURENDA AND A. BANSKI: Dependence of the boiler flue gas losses on humidity of wood biomass	77
J. TERPIŁOWSKI, B. GAWRON AND G. WORONIAK: Investigation of transient heat transfer in composite walls using carbon/epoxy composites as an example	87
