

Contents

P.K. KONCHADA, V. PV AND V. BHEMUNI: Statistical analysis of entropy generation in longitudinally finned tube heat exchanger with shell side nanofluid by a single phase approach	3
J.T. CIEŚLIŃSKI: Effect of nanofluid concentration on two-phase thermosyphon heat exchanger performance	23
T. BOHDAL, K. WIDOMSKA AND M. SIKORA: The analysis of thermal and flow characteristics of the condensation of refrigerant zeotropic mixtures in minichannels	41
A. NIEDŹWIECKA, G.H. SCHNERR AND W. SOBIESKI: Review of numerical models of cavitating flows with the use of the homogeneous approach	71
D. MIKIELEWICZ AND B. JAKUBOWSKA: Prediction of flow boiling heat transfer coefficient for carbon dioxide in minichannels and conventional channels ..	89
J. BARTOSZEWICZ AND L. BOGUSŁAWSKI: Numerical analysis of the steam flow field in shell and tube heat exchanger	107
