

Contents

A. RUCIŃSKI AND A. RUSOWICZ: Thermoelectric generation of current – theoretical and experimental analysis	3
M. SIKORA AND T. BOHDAL: Modeling of pressure drop during refrigerant condensation in pipe minichannels	15
R. BRYK, H. SCHMIDT, T. MULL, T. WAGNER, I. GANZMANN AND O. HERBST: Modeling of KERENA emergency condenser	29
J. KUPECKI, K. MOTYLIŃSKI, M. SKRZYPKIEWICZ, M. WIERZBICKI AND Y. NAUMOVICH: Preliminary electrochemical characterization of anode supported solid oxide cell (AS-SOC) produced in the Institute of Power Engineering operated in electrolysis mode (SOEC)	53
J. KOTOWICZ, Ł. BARTELA AND K. DUBIEL-JURGAŚ: Analysis of energy storage system with distributed hydrogen production and gas turbine	65
J. KAJUREK, A. RUSOWICZ AND A. GRZEBIELEC: The influence of stack position and acoustic frequency on the performance of thermoacoustic refrigerator with the standing wave	89
P. ŻYMEŁKA, D. NABAGŁO, T. JANDA AND P. MADEJSKI: Online monitoring system of air distribution in pulverized coal-fired boiler based on numerical modeling	109
G.B. VARLAMOV, K.A. ROMANOVA, I. NAZAROVA, O. DASCHENKO AND A. KAPUSTIANSKY: Improvement of energy efficiency and environmental safety of thermal energy through the implementation of contact energy exchange processes	127
M. LEŚKO AND W. BUJALSKI: Modeling of district heating networks for the purpose of operational optimization with thermal energy storage	139

J. GRZESZCZAK, Ł. GRELA AND T. ACHTER: Environmentally friendly replacement of mature 200 MW coal-fired power blocks with 2 boilers working on one 500 MW class Steam Turbine Generator (2on1 unit concept)	165
K. KOWALSKA AND B. AMBROŹEK: Modeling the performance of water-zeolite 13X adsorption heat pump	191
M. GRODZKI, P. DARNOWSKI AND G. NIEWIŃSKI: Monte Carlo analysis of the battery-type high temperature gas cooled reactor	209
