

Contents

R. MURMU, P. KUMAR AND H.N.SINGH: Heat transfer and friction factor correlation for inclined spherical ball roughened solarair heater	3
O. AKINSIPE, A. ANOZIE AND D. BABATUNDE: A study of LNG processes to determine the effect of end flash systems on efficiency	35
A. ABDOLHOSSEIN ZADEH AND S. NAKHJAVANI: Thermal analysis of a gravity-assisted heat pipe working with zirconia-acetone nanofluids: An experimental assessment	65
A.M. ZENKOUR AND A.E. ABOUELREGAL: Two-temperature theory for a heated semi-infinite solid by a pulsed laser radiation	85
V.M.F. MOLCRETTE AND V.A.R. AUTIER: New expression to calculate quantity of recovered heat in the earth-pipe-air heat-exchanger operating in winter heating mode	103
O.G. FADODUN, B.A. OLOKUNTOYE, A. O. SALAU AND A A. AMOSUN: Numerical investigation and sensitivity analysis of entropy generation of $\text{Al}_2\text{O}_3/\text{H}_2\text{O}$ nanofluid in turbulent regime using response surface methodology	119
K. LOTFY, ALAA ABD EL-BARY, MOHAMED ALLAN AND MARWA H. AHMED: Generalized thermal microstretch elastic solid with harmonic wave for mode-I crack problem	147
P.K. KONCHADA, B. SUKHVINDER, S. RELANGI AND R. CHEKURI: Neuro-genetic optimization of ribbed heat exchanger using entropy augmentation generation number	169
H. MZAD AND A. OTMANI: Thermal simulation of a continuous casting process subjected to water-sprays cooling	185
A. AZIZ AND S. REHMAN: Analysis of non-equidistant baffle spacing in a small shell and tube heat exchanger	201

B. MADHUSUDHANA RAO, D. GOPAL, N. KISHAN, SAAD AHMED AND P. DURGA PRASAD: Heat and mass transfer mechanism on three-dimensional flow of inclined magneto Carreau nanofluid with chemical reaction	223
KUMAR R., CHANDRA P. AND PRABHANSU: Innovative method for heat transfer enhancement through shell and coil side fluid flow in shell and helical coil heat exchanger	239
H.N.S. AL-JOBOORY: Experimental investigation of gravity-assisted wickless heat pipes (thermosyphons) at low heat inputs for solar application	257
A. ZIĘBIK AND W. STANEK: Energy efficiency – selected thermo-ecological prob- lems	277
