

## Contents

H.N.S. AL-JOBOORY: Experimental and theoretical investigation of an evacuated tube solar water heater incorporating wickless heat pipes .....	3
Y. MENNI, A.J. CHAMKHA, C. ZIDANI AND B. BENYOUCEF: Analysis of thermo-hydraulic performance of a solar air heater tube with modern obstacles .....	33
V. KUMAR: Augmentation in heat transfer and friction of three sides over one side dimple roughened solar duct .....	57
J. TALAGA AND P. DUDA: Identification of the liquid turbulent flow based on experimental methods .....	91
K. KIEDRZYŃSKI: Increasing of efficiency of the cooling duct by modification of its geometry .....	103
D. KUMAR AND L. PRASAD: Performance analysis of three sides solar air heater having roughness elements as a combination of multiple-v and transverse wire on the absorber plate .....	125
M.K. SAHU, M.M. MATHESWARAN AND P. BISHNOI: Experimental investigation of augmented thermal and performance characteristics of solar air heater ducts due to varied orientations of roughness geometry on the absorber plate .....	147
H.K. GHRITLAHRE AND P.K. SAHU: A comprehensive review on energy and exergy analysis of solar air heaters .....	183
T. CHOMPOOKHAM, S. SICHAMNAN, N. BHUWAKIETKUMJOHN AND T. PARAMETTHANUWAT: The rectangular two-phase closed thermosyphon: A case study of two-phase internal flow patterns behaviour for heat performance .....	223
H.K. GHRITLAHRE, P. CHANDRAKAR AND A. AHMAD: Solar air heater performance prediction using artificial neural network technique with relevant input variables .....	255
