

Contents

M. WITEK AND F. UILHOORN: A data assimilation approach for estimating strength of steel pipes reinforced with composite sleeves under unsteady pressure-flow conditions	3
P. TRAWIŃSKI: Development of real gas model operating in gas turbine system in Python programming environment	23
M. MAJKUT, S. DYKAS AND K. SMOLKA: Light extinction and ultrasound method in the identification of liquid mass fraction content in wet steam ..	63
B. HERNIK AND W. ZABŁOCKI: Numerical research of combustion with amini-mum boiler load	93
E. DOBKIEWICZ-WIECZOREK: Influence of surface condensers connection configuration on power plant unit performance	115
M. PRZYBYŁA AND A. ADAMKIEWICZ: Quantity and quality of marine dual-fuel engine's exhaust sensible waste heat considering different sulfur content in fuels	147
Z. DROŻYŃSKI: Irreversible energy degradation in heat transfer between two fluids – analysis on manifolds	169
V. KINDRA, A. ROGALEV, O. ZLYVKO, A. ZONOV, M. SMIRNOV AND I. KAPLANOVICH: Research on oxy-fuel combustion power cycle using nitrogen for turbine cooling	191
P. KLIMASZEWSKI, P. KLONOWICZ, P. LAMPART, Ł. WITANOWSKI, D. ZANIEWSKI, Ł. JĘDRZEJEWSKI AND T. SUCHOCKI: Design and performance analysis of ORC centrifugal pumps	203
P.P. WIŚNIEWSKI, S. DYKAS AND Q. ZHANG: Numerical studies of air humidity importance in the first stage rotor of turbine compressor	223
Continued on inside back cover	

Continued from back cover

A.P. WEISS, P. STREITA, T. POPP, P. SHOEMAKER, T. HILDEBRANDT, V. NOVOTNÝ AND J. ŠPALE: Uncommon turbine architectures for distributed power generation – development of a small velocity compounded radial re-entry turbine	235
K. DOMINICZAK, M. DROSIŃSKA-KOMOR, R. RZADKOWSKI AND J. GŁUCH: Optimisation of turbine shaft heating process under steam turbine run-up conditions	255
C. ZIDANI, B. BENYUCEF, F. DIDI AND N. GUENDOZ: Simulation and numerical analysis of a rectangular pipe with transversal baffle – comparison between zigzag and plane baffles	269
