

Contents

A. ANDREARCZYK: Flow characteristics of an automotive compressor with an additively manufactured rotor disc	3
A.M. MUSIAŁ, Ł. ANTČAK, Ł. JĘDRZEJEWSKI AND P. KLONOWICZ: Analysis of the use of waste heat from a glass melting furnace for electricity production in the organic Rankine cycle system	15
A. KOPROWSKI AND R. RZADKOWSKI: Computational fluid dynamics analysis of 1 MW steam turbine inlet geometries	35
R. SZWABA, K. HINC, T. OCHRYMIUK, Z. KRZEMIANOWSKI, P. DOERFFER, AND M. KUROWSKI: Open low speed wind tunnel – design and testing	57
F.R. SAEED AND M.A. AL-DULAIMI: Numerical investigation for convective heat transfer of nanofluid laminar flow inside a circular pipe by applying various models	71
A. RUSANOV AND R. RUSANOV: The influence of stator-rotor interspace overlap of meridional contours on the efficiency of high-pressure steam turbine stages	97
H. MZAD AND A. OTMANI: Simulation of photovoltaic panel cooling beneath a single nozzle based on a configurations framework	115
Z. ZAPĄŁOWICZ AND A. GARNYSZ-RACHTAN: Estimation of solar radiation transmission for polycarbonate retractable swimming pool enclosures	129
M.N. KHAN: Performance of a combined cycle power plant due to auxiliary heating from the combustion chamber of the gas turbine topping cycle	147
A. DATTA AND P. HALDER: Thermal efficiency and hydraulic performance evaluation on Ag–Al ₂ O ₃ and SiC–Al ₂ O ₃ hybrid nanofluid for circular jet impingement	163
B. XU, Y. CHEN AND Z. MA: Exergetic sustainability indicators of a polymer electrolyte membrane fuel cell at variable operating conditions	183
