

Contents

L. RUTKOWSKI AND I. SZCZYGIEL: Calculation of the furnace exit gas temperature of stoker fired boilers	3
U. KHAN AND R. ZEVENHOVEN: Passive cooling through the atmospheric window for vehicle temperature control	25
R. LASKOWSKI, A. SMYK, A. RUCIŃSKI, AND J. SZYMCZYK: Determining steam condensation pressure in a power plant condenser in off-design conditions .	45
G. JUN, M. KOLOVRATNÍK AND M. HOZNEDL: Wet steam flow in 1100 MW turbine	63
P. RADOMSKI, P. ZIÓŁKOWSKI, L. DE SIO, AND D. MIKIELEWICZ: Computational fluid dynamics simulation of heat transfer from densely packed gold nanoparticles to isotropic media	87
H.K. GHRIHLAHRE: An experimental study of solar air heater using arc shaped wire rib roughness based on energy and exergy analysis	115
J. MIKIELEWICZ, O. DOLNA, AND R. KWIDZIŃSKI: Diffusive-inertial droplet separation model from two-phase flow	141
K. NGUYEN TRUNG: Effect of heat transfer correlation on wet cylinder liner temperature distribution when converting an old engine into a turbocharged engine	159
A. BIENIEK, W. JERZAK, AND A. MAGDZIARZ: Numerical investigation of biomass fast pyrolysis in a free fall reactor	173
A. KOPROWSKI AND R. RZĄDKOWSKI: Computational fluid dynamics analysis of several designs of a Curtis wheel	197
ILDAR FATHI AJIRLOU AND CÜNEYT KURTAY: Assessing the performance of the airflow window for ventilation and thermal comfort in office rooms	209
G. WAŁOWSKI: Assessment of the flow of substrate and agricultural biogas through the adhesive skeleton bed in phenomenological and numerical terms	243
S.J. GŁUCH, P. ZIÓŁKOWSKI, Ł. WITANOWSKI, AND J. BADUR: Design and computational fluid dynamics analysis of the last stage of innovative gas-steam turbine	255
A.M. ALHARBI, E.M. ABD-ELAZIZ, AND M.I.A. OTHMAN: Refined multi-phase-lags theory and Thomson effect on a micropolar thermoelastic medium with voids	279
