Energy Equilibrium

This project will develop **Energy Equilibrium Platform** – an interactive and easily applicable tool to support municipalities and energy suppliers in **decision-making** related to the development of efficient action plans to accelerate local RES utilization in the region, focusing on the development of sufficient **energy storage infrastructure** in the regions.

This #MadeWithInterreg project helps drive the transition to a green and resilient Baltic Sea region.

Organisations from the following countries cooperate together to make that happen:

Latvia, Lithuania, Poland, Sweden, Germany, Finland
